Einführung Mundorf HiFi AMT Introduction of Mundorf HiFi AMT

Mundorf bietet heute zweifelslos die weltweit größte Auswahl an Air Motion Transformer (AMT) für die unterschiedlichsten Anwendungen und Anforderungen an. In der vorliegenden Broschüre werden die aktuellen Modelle der Mundorf HiFi, Monitor und Hochwirkungsgrad-AMT vorgestellt. Allen gemeinsam ist das exzellente Impulsverhalten und die ungewöhnliche Verzerrungsarmut der Musikwiedergabe! Die Unterschiede liegen vor allem im Übertragungsbereich, dem Schalldruck und dem Bündelungsverhalten.

Die Modelle der AMT19-Reihe sind für den Einsatz in 3+Wege-Kombinationen entwickelt, die Baureihen AMT21, AMT23 und AMT25 eignen sich bestens für 2+Wege Anwendungen.

Die Varianten des AMT164U (patentierte U-Shape Polplatten) bieten sich aufgrund ihrer starken vertikalen Bündelung, ihrer hohen Empfindlichkeit und den sensationell niedrigen Klirrwerte für Monitorsysteme und HiFi-Anwendungen allerhöchsten Ansprüche an.

Die als Dipol-AMT entwickelten Modelle wurden in zwei Linien optimiert. Zum einen Dipol-Varianten, die für eine freistehende Montage optimiert wurden. Sie ähneln durch diese in ihrem Impulsverhalten einem, in offener Schallwand montierten Tiefmitteltöner. Für derartige Konzepte optimal geeignet sind AMT17D1.1, AMT17D2.1, AMT23D1.1, AMT25D1.1 und AMT27D1.1 .

Eine weitere Reihe an Dipolen ist für die Montage in nach hinten offenen Schallwänden optimiert: AMT23D6.1, AMT25D6.1, AMT27D6.1 .

Der Dipol AMT17D hat sich außerdem hervorragend als ergänzender Superhohtöner bewährt, der sich mittels mitgelieferten Komponenten akustisch und mechanisch leicht mit jeder Lautsprecherbox kombinieren lässt und freistehend auf ihr platziert werden kann.

Der AMT29 ist mit seiner hohen Empfindlichkeit von 100 dB, seiner außergewöhnlichen Linearität und seinem ausgedehnten Frequenzbereich die Synthese aus MUNDORF HIFI AMT und MUNDORF PRO AMT.

Informationen zu unserem AMT PRO Programm finden Sie unter mundorf.com.

Mundorf offers undoubtedly today's largest selection of Air Motion Transformer (AMT) worldwide. Its different lines were developed for certain applications and requirements. The present brochure introduces the current lines of Mundorf HiFi AMT tweeters, of which all have two superior key properties in common: An excellent transient response and an outstanding low distortion ratio! The differences lie mainly in their frequency ranges, sound pressure levels and dispersion angles.

AMT19 series are designed for use in 3+way-systems, whereas AMT21, AMT23 and AMT25 models are suitable for 2+way-applications.

The various AMT164U models (patented U-Shape pole plates) recommend themselves for usage in professional but high quality monitor systems as well as for the ultimate HiFi speaker. Their narrow vertical dispersion angle, high sensitivity and low distortion ratio result in both unique precision and musicality.

The dipole AMT models come in two lines. One line is optimized for a free-standing installation. Their transient response is very similar to a woofer's transient response when mounted in an open baffle. Ideally suited for such concepts are AMT17D1.1, AMT17D2.1, AMT23D1.1, AMT25D1.1 and AMT27D1.1 .

A second line of dipole AMTs is optimized for matching open-baffles concepts perfectly. Please look up AMT23D6.1, AMT25D6.1 and AMT27D6.1 .

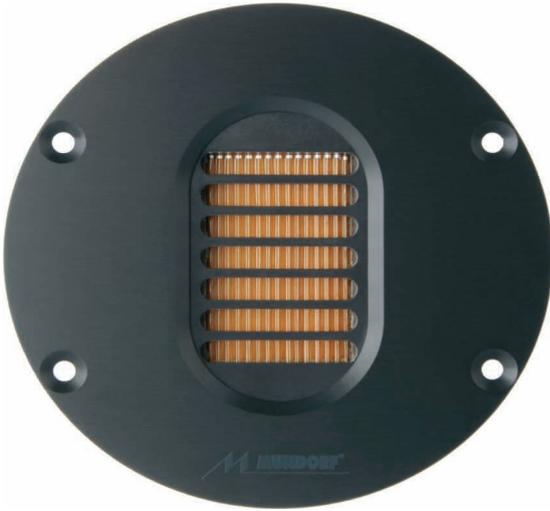

Dipole AMT17D has also proved itself as an outstanding supplementary super tweeter, which can easily be matched with any given speaker. Components for the perfect acoustical adjustment and appropriate stands for free-standing on-top placement are available, too.

Finally, with its high 100 dB sensitivity, an exceptional linearity and its extended frequency range, AMT29 represents the perfect synthesis of MUNDORF HIFI AMT and MUNDORF PRO AMT models.

hifiAMT®19CM1.1-C

Preis/Price 179 €

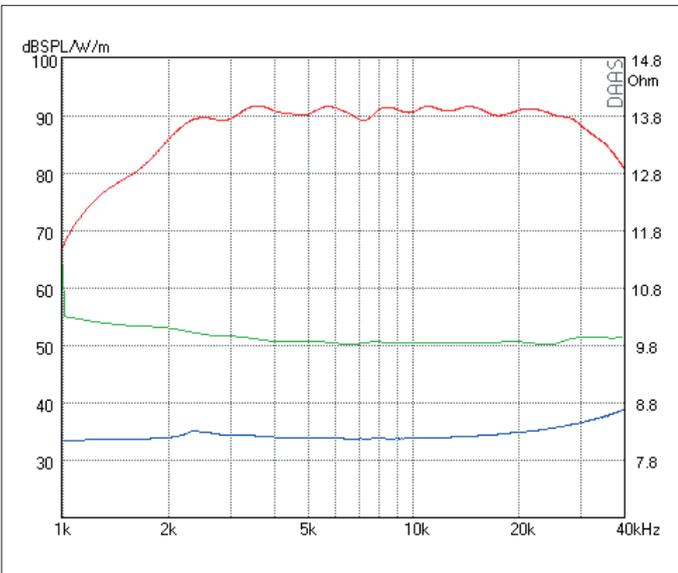

High End AMT für 3-Weg Systeme. Die 1.1-Variante ist für die Anwendung mit einer 12dB- Weiche optimiert und ermöglicht so eine besonders tiefe Übernahmefrequenz.

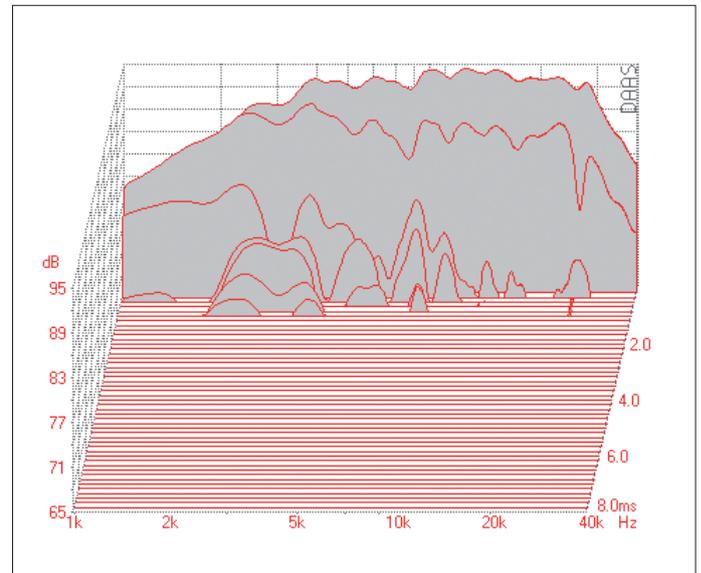

- Sehr niedrige Verzerrungen
- Sehr flache Impedanzkurve
- Gutes Rundumstrahlverhalten

High End AMT for 3-way systems. The 1.1 version is optimized for use with a 12dB crossover, allowing a particularly low crossover frequency.

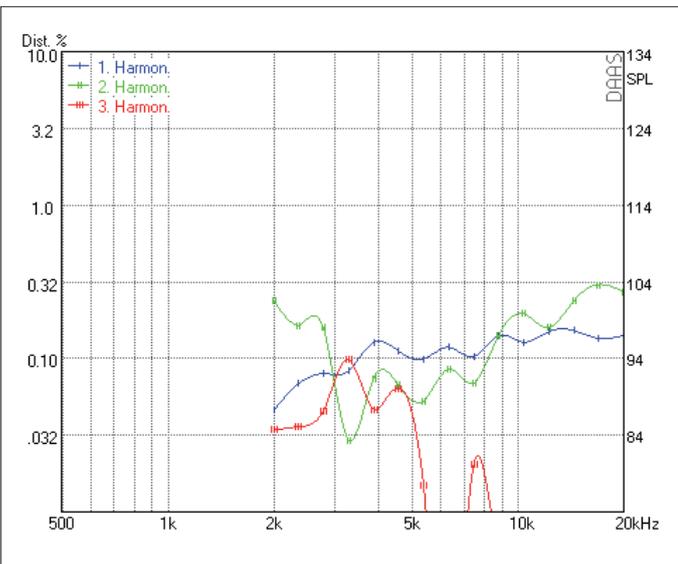

- Very low distortion
- Very flat impedance curve
- Wide spread directivity

DIAPHRAGM AREA	6464 mm ²
MAGNET MATERIAL	NEODYMIUM
FACE PLATE	non

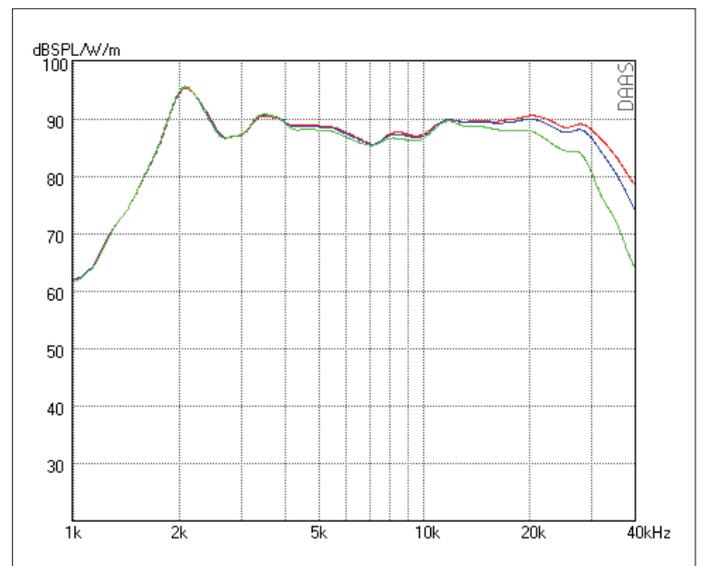

Impulse Response

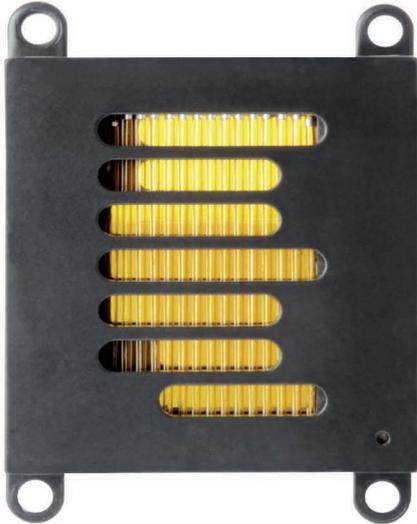

Step Response

SPL HORIZONTAL 0° - 15° - 30°

SPL VERTIKAL 0° - 5° - 15°

Dipol zur freien Aufstellung. Mit Resonanzlinearisierung ist eine Übernahmefrequenz von 1.8 kHz möglich. Die Parallelschaltung von drei AMT's übereinander ermöglicht den Aufbau eines Wohnzimmer- Line- Arrays.

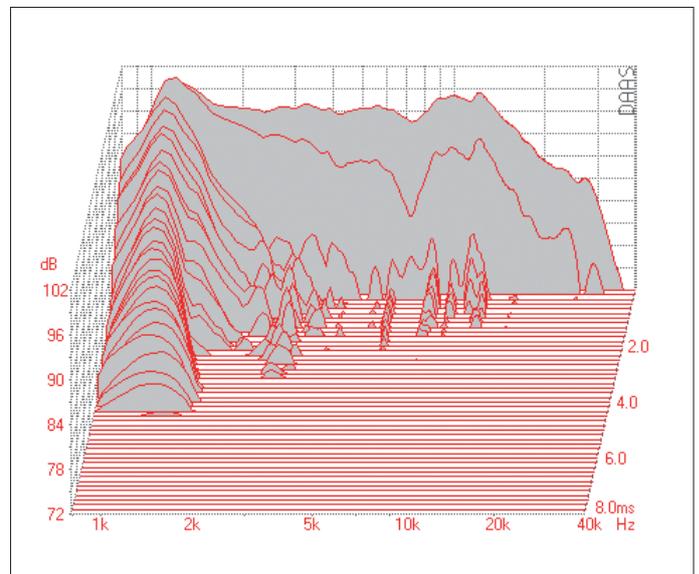

- Keine Schallwand notwendig
- Sehr linearer Frequenzgang • 14 Ohm, 97 dB
- Ausschwingverhalten optimiert auf Dipol- Einsatz

Free-standing Dipole. With a resonance linearization crossover frequency of 1.8 kHz is possible. The parallel connection of three AMT's one above the other allows the construction of a "living room line array".

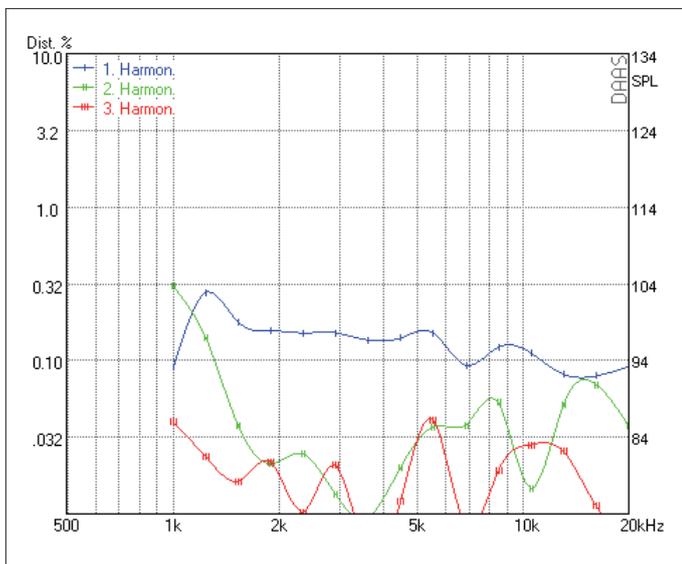

- No baffle required • Very flat frequency response
- 14 Ohm, 97 dB • Swing- out behaviour optimized for dipole use

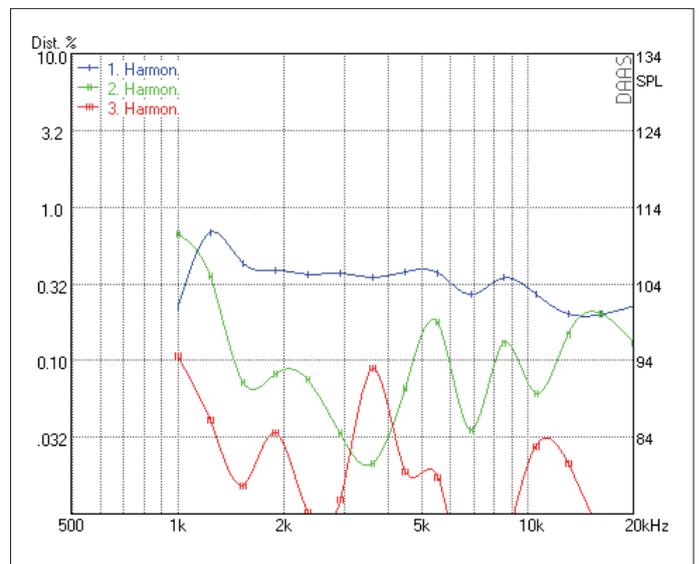

SPL 2.83 V - Phase - Impedance

Waterfall

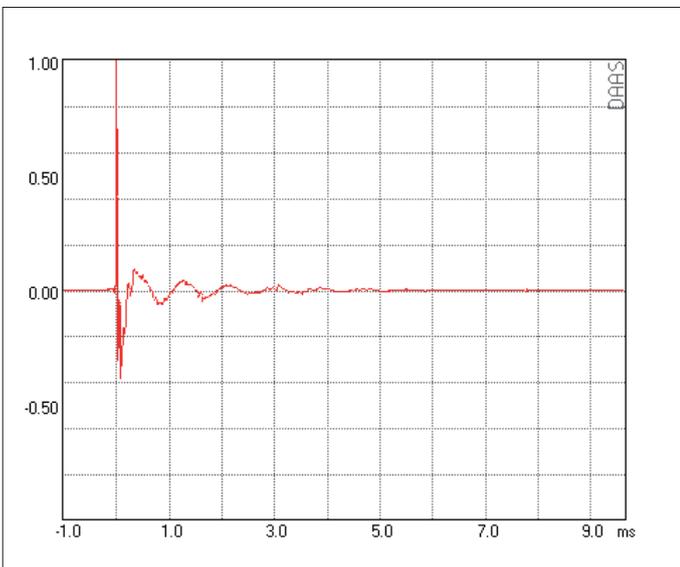

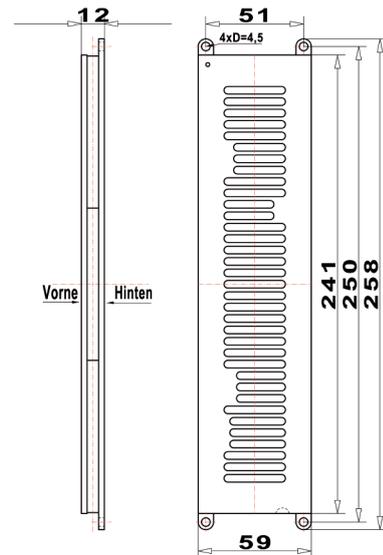

Harmonic Distortion 2.83 V

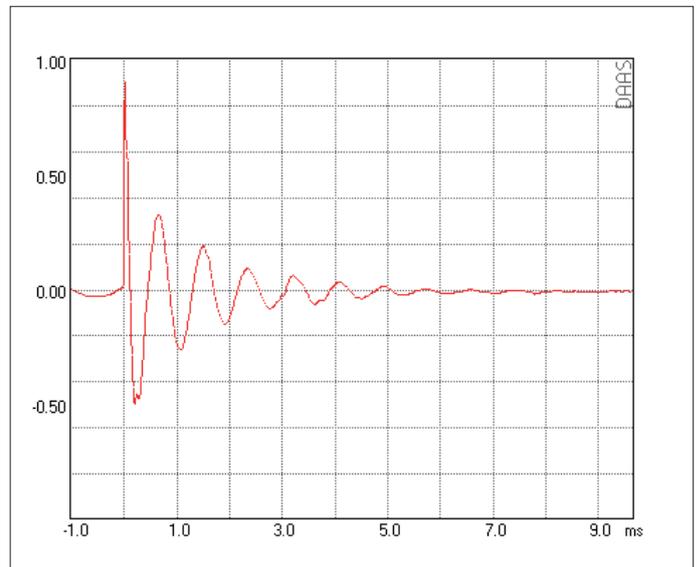

Harmonic Distortion 105 dB

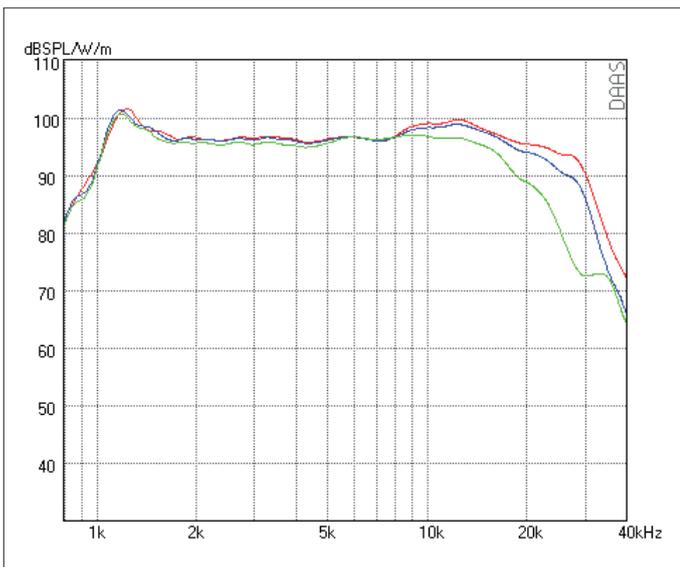

RESISTANCE	NOMINAL 12 OHM
Zo 16.3 OHM • Zmin 13.9 OHM • RE 13.5 OHM	
SENSITIVITY @ 2.83 V	97 dB
FREQUENCY RESPONSE / -6 dB	1000 Hz – 29 kHz
POWER HANDLING	190 W
RESONANCE FREQUENCY / FS	1150 Hz
RECOMMENDED CROSSOVER / 6 dB	2400 Hz
RECOMMENDED CROSSOVER / 12 dB	1800 Hz
DISPERSION HORIZONTAL / 15 kHz / -6 dB	55°
DIAPHRAGM AREA	8910 mm ²
MAGNET MATERIAL	NEODYMIUM
FACE PLATE	non

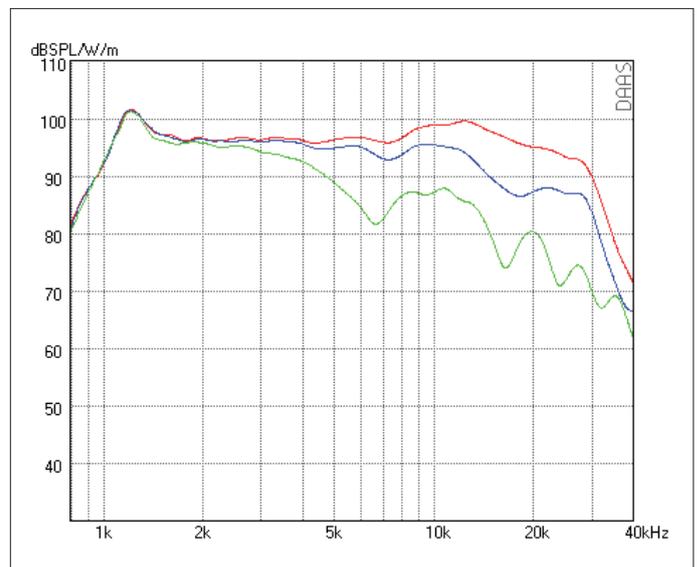

Impulse Response

Step Response

SPL HORIZONTAL 0° - 15° - 30°

SPL VERTIKAL 0° - 5° - 15°
